

the most gracious, the most merciful Apa Shoe Companies launched its activities in producing various types of military, security, special, sports and ankle boots in 1982.

The companies cover an area of 100,000 square meters in different salons, each of which is about 10,000 square meters. Apa uses the world's latest technologies and well-equipped machines industrialized countries such as Germany, Italy and England.

Nowadays, Apa has turned into the most powerful shoe company in the Middle East. Due to the use of direct sole-to-sole injection technology in Iran for the first time, it can Manufacture more than 1,000,000 pairs of military boots annually.

The only winner of the Iranian National Quality Award (INQA) in the shoe production industry.
Holder of ISO 17025 certificate in shoe laboratories. Fellow of the Iranian Studies and Standards Organization.
Holder of ISO 9001-2008 certificate awarded by TUV Dutch NORD in shoe industries.

The first producer of military shoes with 2-part soles (PU&R) in accordance with international military standards.
Producer different types of soles including: R. PU. PVC. PU+R.TPU PU+PU...

On the one hand, after using the experience of competent engineers, the company's R&D department designs and produces the latest models according to customer needs. On the other hand After analyzing customer surveys, the company has taken great steps to meet the requirements of its customers. Satrap Sanat Artin Company launched its activities in 2006.

maybe It develops very rapidly in business fields and has gained valuable experience in national and international business.

The company was honored to become the international sales agent for Apa Company.
